

Century Shower Door Care and Cleaning

Anodized Aluminum & Painted Enclosures

Only Non-Abrasive, Non-Caustic Cleansers are recommended for cleaning Anodized Aluminum, as well as Painted Finishes

The following cleaning agents should be avoided:

- Vinegar or vinegar-based products.
- Abrasive or soft abrasive powders and liquids
- Bleach or bleach-based cleaners.
- Steel or Teflon pads

Plated Solid Brass Enclosures

Clean brass with clear water and wipe dry with a soft cloth. Never use abrasive cleansers, strong general household cleansers, or brass polish formulations. Only “Flitz Metal Polish” can safely be used.

Clear Coated Polished Brass (GG & GW Hinges Only)

Use ONLY water and dry with a soft towel.

Glass Care

Caring For Your **Diamon-Fusion®** Treated Shower Glass

If your unit is treated with Diamon-Fusion, Century Bath works suggests that you simply pour cool water along the top edge of the glass after each shower. Most of the soapy residue will run off. A dry washcloth will remove the few drops of water that remain. This will allow the maximum time between cleaning without permanent staining. If your enclosure is not maintained routinely, or you have hard water, it may be necessary to use a wet body scrubber (similar to those used with liquid body soaps) to lightly scrub away any water spots or marks and remove excess films.

Diamon-Fusion's Approved List of Cleaners

- Spray way®
- Simple Green®
- Ammonia Free Windex®
- White household vinegar diluted with water
- Seventh Generation® Natural Glass & Surface

Caring For Your Shower Guard® Treated Shower Glass

Your Shower Guard glass enclosure will look new for a lifetime with easy care using recommended cleaning products. Unlike ordinary glass, it won't stain or etch over time, so your cleaning routine is always rewarded with clear, beautiful results.

A soft sponge, common household cleanser and a water rinse is all it takes to keep your Shower Guard glass enclosure looking like the day it was installed. Use one of the many recommended cleaning products listed on the back cover for best results. No matter your preferred cleanser, be sure to follow the instructions provided by the manufacturer.

For best results cleaning Shower Guard glass use:

- Soft Scrub® Cleanser All Purpose with a Scotch-Brite® Non-Scratch Sponge

These other household cleaners have been tested and are recommended for use on Shower Guard glass:

1. Arm & Hammer
2. Bar Keepers Friend® Soft Cleanser
3. Clorox Greenworks Glass Cleaner
4. Comet Bathroom Cleaner Spray with Disinfectant
5. Fantastik Antibacterial Heavy-Duty Cleaner
6. Holy Cow Glass Cleaner
7. Invisible Glass Premium Glass Cleaner
8. iQ Glass Cleaner
9. J.R. Watkins Window Cleaner
10. Kaboom Shower, Tub & Tile Cleaner
11. Lime-a-Way Bathroom Cleaner
12. Lysol Bathroom Cleaner
13. Method Mint Natural Glass Cleaner
14. Mr. Clean Magic Eraser

15. Mrs. Meyer's Clean Day Glass Cleaner
16. Nature's Sourceo Natural Bathroom Cleaner
17. Scrubbing Bubbles Auto Shower Cleaner
18. Seventh Generationo Natural Glass & Surface Cleaner
19. Soft Scrub< with Bleach Cleanser

21. Spray way Ammonia Free Glass Cleaner
22. Tilex Fresh Shower
23. Vim Cream Cleanser
24. Windex Original Glass Cleaner
25. Windex Multi-Surface Vinegar
26. Mixture of 50/50 water and vinegar

Please adhere to the following precautions to avoid scratching and damaging your Shower Guard product:

Avoid abrasive cleaners, such as: Ajax®, Comet® Powder, CRL Bio-Clean, CRL "Sparkle," Rouge and Cerium Oxide. Hydrofluoric and phosphoric acids are corrosive to the coating and glass surfaces and should not be used. Do not use abrasive brushes, razor blades or other sharp objects.

Caring For Your UNTREATED Shower Glass

If your unit is not treated with Diamon-Fusion or Shower Guard, it is recommended that you clean after each use with a squeegee and dry with a towel. Comet Non-Abrasive Spray Cleaner may be used if needed for soap scum and hard water film should the enclosure not be maintained after each use.

General Cleaning Information

Do not leave cleaning agents on your enclosure for an extended period. Although some cleaners are safe to use and wipe off immediately, the same cleaners can cause permanent damage if allowed to sit on metal surfaces.

Although Century Bath works shower enclosures will keep water inside the shower under normal conditions, it is recommended that you do not direct your shower head directly at the enclosure. This could cause water to escape.
